Peru, Hall 4.1 Stand A-07

The **Swiss Import Promotion Programme** (SIPPO), under the patronage of Swiss state secretariat for economic affairs (seco), helps small and medium-sized enterprises (SME) from emerging markets and markets in transition to access the Swiss and EU markets as well as assisting Swiss and European importers to find the right partners in emerging markets and markets in transition.

SIPPO's activities focus on five main goals:

- To inform the Swiss and EU importers on new market sources
- To include trade institutions and business branch associations in the trade promotion process
- To increase the competitiveness of small and medium-sized enterprises in selected partner countries
- To develop their manufacturing and exporting skills
- To establish qualified trade contacts between SMEs from emerging markets and markets in transition, with the Swiss and EU import economy

Repeated participations at selected international trade fairs are a prerequisite for future success and a major milestone in the trade promotion process.

Products	Production and trade with dehydrated fruits and vegetables Production and trade with all kinds of nuts (raw and roasted)

The company „**Detelina**“ was founded in 1989 to produce and trade with nuts (raw and roasted), dried fruits and vegetables. Due to the permanent strict quality control at each stage of production we are managing to create a brand image for our products and establishing our own trademark „Detelina“ for the market. Our products are presented in ecological packaging with modern design, in accordance with customer needs.

The company possesses about 4500 m2 of its own delivery, production and storage stations equipped with modern technological equipment for selection, roasting and packaging of products. The total number of employees in our company is 92 people of which 80 are involved in production. The company has a well-developed distribution network throughout the country. We have our own transport facilities, which allow us to establish quick contacts with our clients and make deliveries on time all over the country.

Our main goal is to offer to our customers a wide range of products with the best quality and prices. We are committed to flexibility in our price policy and to honesty with our clients.

We are dealing with regular exports of agricultural commodities and also establishing business relationships, mainly with partners from Russia, Romania, Macedonia, Moldaviq, Ukraine, Greece and Turkey.

During 2004 we have invested in new storage facilities and modern production equipment, and as a result we are expanding our production volumes.

Troyan Commerce Ltd was founded in 1998. The company's main activity is production and trade with dried fruits and vegetables. Troyan Commerce Ltd is a small company with about 40 employees.

The company possesses three California type driers with 7 tunnels and indirect heating methods. They are situated in a beautiful ecological region in the Central Balkans near the Central Balkan National Park. Recently the company has purchased a new drier with 21 tunnels and modern equipment. That allows us to expand our production volumes and to enrich our product range.

We are dealing with regular exports of dried fruits and vegetables. Our product line includes also dried herbs and spices. We are dealing with walnut kernels and other agricultural commodities such as pumpkin seeds among others. We are interested in establishing business relationships with partners from other European countries.

Products	Services: Exports promotion, investment promotion, Lobbying, Sector Consultants, Training, Direct Assistance Program, Commercial Information

Mission: To promote exports and investments of productive sectors, through the provision of quality technical services, contributing to enhance the image and the competitive development of the country.

Objectives: The guidelines that steer the activities of CORPEI are set forth in the Law whereby the corporation was created and include:

- To execute the non-financial promotion of exports within the country and abroad. This includes activities, that, as a whole and with the financing of national productive units, are carried out in areas related to information, training, technical assistance, market development, external promotion, and other activities aimed at diversifying and increasing the exportable offer of Ecuador, as well as promoting it in foreign markets.
- To assist natural and legal persons dedicated to export activities in the development of processes.
- To guide and direct the promotion of direct investments in the country. This includes complying with programs to disseminate investment opportunities, publicizing the image of the country abroad, organizing investment missions and other promotional events.

E-Mail	evalencia@pitacava.com
Website	www.pitacava.com
Contact	Eduardo Valencia
Products	Yellow pitajaya: a) Supreme (above 180 grs.) b) Superior (between 140-180 grs.) c) Special (less 140 grs.) The fruit is air transported in hard-fancy boxes of 2 kilogram weight (net).

Known world-wide as a gourmet fruit for its exquisite flavour, our pitajaya is cultivated in an agricultural zone situated between the ocean and the mountains, two hours from Quito, the capital city of Ecuador, in a sub-tropical rain forest zone.

Apart from its delicious flavour and refreshing quality, pitajaya possesses medicinal properties that are continually being discovered. Among its many effects pitajaya helps to regulate the nervous system, corrects stress-induced digestive and renal problems, and aids in the well-being and functioning of the heart due to the presence of Captina. Its high concentration of Phosphorus and Vitamin C contributes to the development of cerebral functions and a strong immune system.

Agricola Pitacava was founded in 2004. At the moment five hectares are in full production and for the second semester of this year two more are expected. Quarterly production is 14.000 kilos. Since the very beginning the project is export oriented.

Equinox Business Ltd was founded on December 6 2000, it is a young company, based in Quito, capital city of Ecuador and recently we've opened an office in Bogotá, the capital city of Colombia. Our main activity is the production and export of exotic fruits to the EU market (Germany, Holland, Switzerland and United Kingdom).

Our export strategy is customer-focused and based on IPM (Integrated Pest Management) and GAP (Good Agricultural Practices) schemes. Currently, we have 20 employees, 4 in administration and 16 in production.

Our processing plant is located in the valley of Tumbaco, 20 km from Quito. We are in the process of obtaining the EurepGap certification for the farms and the processing plant. We offer a wide variety of Andean exotic fruits and vegetables, fresh and processed. All them packed in totally recyclable materials.

Products	Fresh fruits: Mango, pineapples, tahiti limes

Terelsa S.A. initiated their activities in 1997 exporting and offering packing service of Mangoes and other fruits to Growers, Exporters and Importers. The company uses Hot Water Treatment for its Mangos. We have a system of classification totally digitized and equipment with advanced technology outpost; we are modernizing constantly, adapting processes, machineries and systems to deliver to international markets with the best product.

Terelsa S.A. has an infrastructure of 300'000 square feet; the areas of reception, rest of fruit, classification, packing and cooling storage totally designed for a perfect fruit handling and exportation. The company has been increasing their exporting force year after year and is the plant with the largest annual growth in Ecuador in packing and its exportable capacity. In the season 1999-2000 we packed around 250'000 boxes, in the season 2000-2001 around 550'000 boxes and in 2000-2001 around 1'200'000 boxes, of which TERELSA exports 70% approximately. The months between October and February, the mango production in Ecuador takes place. The obtained results demonstrate that Terelsa is an excellent packer and exporter of first quality mangos and its brand MICKY MANGOS are recognized world-wide.

Terelsa S.A. has the advantage that we are not growers; this implies that we have the option to choose the fruit of first quality to satisfy to ours clients, excluding the fruit that does not fulfil the quality demanded internationally.

Products	Yams, cocoyam

The Ghana Yam Producers and Exporters Association is an association of exporting private companies that have come together to present a common voice to promote and protect the interests of member companies.

The association was incorporated in June of 1987 is not for profit. It has a secretariat located within the premises of the Ghana Trade Fair Centre in Accra. The secretariat is headed by an Executive Secretary who is assisted by four other officers. The secretariat co-ordinates the activities of member companies and sources bulk orders from overseas importers. The orders which are received, are then shared among member companies for execution.

It is significant to note that member companies have their own offices, warehouses and employees. It is also significant to note that member firms pay monthly dues and are also levied on proceeds from their exporting activities to support the secretariat.

Products	Help Jordanian farm to export & promote their products

The horticultural Export promotion department has been established on the first of June 2003, as part of Jordan Export Development & Commercial Centres Corporation (JEDCO). A loan was granted to the Jordanian government by the World Bank, to initiate a Project to bring the agriculture sector to higher levels of efficiency and output. This project is called Horticulture export promotion and technology transfer project.

Project Mission

- Expand exports of fruit, vegetables and cut flowers to new and current markets
- Assist the Jordanian farmers in meeting international standard of quality and price.
- Participate at international horticultural and agricultural fairs and launch special trade missions to the European and gulf markets.
- Build up and setup a website to promote national horticultural products.
- Assist farmers to get the modern technology and apply their farming methods. Technical consultants will be allocated to modernize farming techniques in post and pre-harvest method, packaging, water irrigations, standards and certifications.

Company	Progressive Marketing Co. „Dates of Jordan“
Address	P.O. Box 781 Amman 11118 Jordan

Website	www.datesofjordan.com
Contact	Ms Rana Al-Rayyan
Products	Medjool dates

In 1998 Mr. Kawar consolidated the family farms in the Jordan Valley to start the **Progressive Agricultural Investment Company**. The idea was to produce a Jordanian product that could compete in any market in terms of quality, price and packaging. Keeping with environmental concerns, and constrained by climatic factors the decision was clear to grow the splendid date palm. Further market studies as well as the Jordan Valley's dry summers and cool winters helped us with our decision to grow the Medjool Date. Today, there are almost 10000 palms and the operation is ever expanding.

Due to the exponential growth that we have experienced over the past six years and forecasting it for the next ten to come, the decision was made to create a fourth company that was specifically designed to market these dates. Progressive Marketing Company was founded in Dec. of 2002, with a special division called Dates of Jordan. We did not want the sale of the crop to be at the price of its quality, therefore Progressive Agricultural Investment Company focused only on the growing and harvesting of the Dates, while Dates of Jordan took it from there, Fumigation, cleaning, sorting, packaging and sale are all responsibilities of this new company. A year and a half later, two other companies were created to increase the awareness for the Medjool Dates.

Modern Delights Company and Delights Company for Chocolates and Confectionary manufacturing, the first opened an outlet that sold only the finest of the farms crop as well as the medjool dates dipped in splendid Swiss and Belgian chocolates, while it was the responsibility of the latter to create these mouth watering treats. Professional placement in existing markets as well as the penetration of new ones are key factors for the success of all four companies.

Bao Thanh Co.,Ltd was created in 2000. It is a small company with 30 employees, six in administration and 24 in production, each one fully committed to our promise of producing quality products. We have four years of experience in exporting fresh red pitahaya (dragon fruit) to China via the border between China and Vietnam by cool trucks at 150 tons monthly. „Ticay,, is our brand name. From 2002, we built up a group with 25 members which mainly produce fresh red pitahaya on 120 hectares only to supply supermarkets, hypermarkets with high quality and a part changing into organic. We are in the process to obtain the EurepGap and organic certification. Our export strategy is customer-oriented and environmentally friendly. We offer new kinds of tropical fruits from Vietnam for different tastes and packaged in recyclable materials. We are looking for a distributor in each country on world-wide for these new exotic fruits in order to establish a long term relationship.
