

The SIPPO Pavilion presents countries in transition

Republic of Macedonia, Serbia and Vietnam At Migest 2011.

Paris, November 15–18, 2011

Hall 6, Aisle U, Booth 38

SIPPO Swiss Import Promotion Programme.

SIPPO, the Swiss Import Promotion Programme, is a mandate of the State Secretariat for Economic Affairs, SECO, within the framework of its economic development cooperation. It is carried out by Osec, the official Swiss foreign trade promotion agency. The programme helps SMEs in developing and transition countries to gain access to the Swiss and European markets by providing information, training courses and other matchmaking services. SIPPO also assists importers from Switzerland and the European Union with finding suitable partners and high-quality products from selected developing and transition countries.

The programme has five main goals:

- To inform the Swiss and European import economy about new market sources
- To strengthen trade institutions and business sector associations in the trade promotion process
- To increase the competitiveness of SMEs in selected partner countries
- To develop the manufacturing and exporting skills of SMEs in selected partner countries
- To establish qualified trade contacts between SMEs from emerging markets and markets in transition and the Swiss and European import economy

Contact: Mrs. Svetlana Vasileska, Mr. Tomo Gjorgieski

Our business is the production, manufacture and trade of technical materials for electrical insulation. We produce phenol and cotton based technical laminates, phenol and paper, epoxy resins and glass fibre, in the form of plates, tubes and rods in accordance with DIN 7735. We fabricate parts according to customers' technical requirements. While also used as original building components, our products are most often used as spare parts in the electrical industry, for the periodic remounting of electrical stoves in metallurgy and of generators in hydroelectric power stations and steam power plants.

Products Electrical insulation. Plastics, rubber, composites processing. Forming of thermosets/compositis. Technical laminates, paper phenol, cotton phenol, epoxy glass, mica and finished parts made from these materials.

Personnel 26

Customers Electrical industry, railways, metallurgy
